

SUNDANCE
Forest Industries Ltd.

Planning Forester

Sundance Forest Industries Ltd. has an immediate, permanent position available in the Woodlands department for a Planning Forester.

The main function of the Planning Forester is the preparation and submission of Final Harvest Plans for future harvesting activities. The ability to work independently and to prioritize tasks as harvest schedules change is essential to ensure the availability of suitable timber to meet the needs of the processing facilities. As part of the Woodlands team, the Planning Forester also participates in other forest management and reforestation activities throughout the year. This is a field (50%) and office (50%) position with opportunities to experience a wide variety of forestry work.

We are seeking a person who can work independently and interact effectively with co-workers, trappers and members of the public. The successful candidate will be registered, or eligible for registration, as a forestry professional in Alberta. He or she will also be competent in the use of GIS and GPS technology and will have experience in forestry field work. A valid Class V Alberta Operator's License is a requirement.

Sundance Forest Industries Ltd. harvests approximately 700,000 m³ per year to supply a sawmill and a secondary manufacturing facility near the town of Edson, Alberta. The company is the largest employer in the area, with a comprehensive employee benefit package and an active Social Club.

Qualified candidates should forward their resumes by 27 January 2012 to:

Pat Golec, MF, P.For.

Woodlands Manager
Sundance Forest Industries Ltd.
